COMPANY PROFILE

An ISO 9001 & 18001 company headquartered in Singapore. A company built on passion and people; we are committed to delivering a leading customer experience.

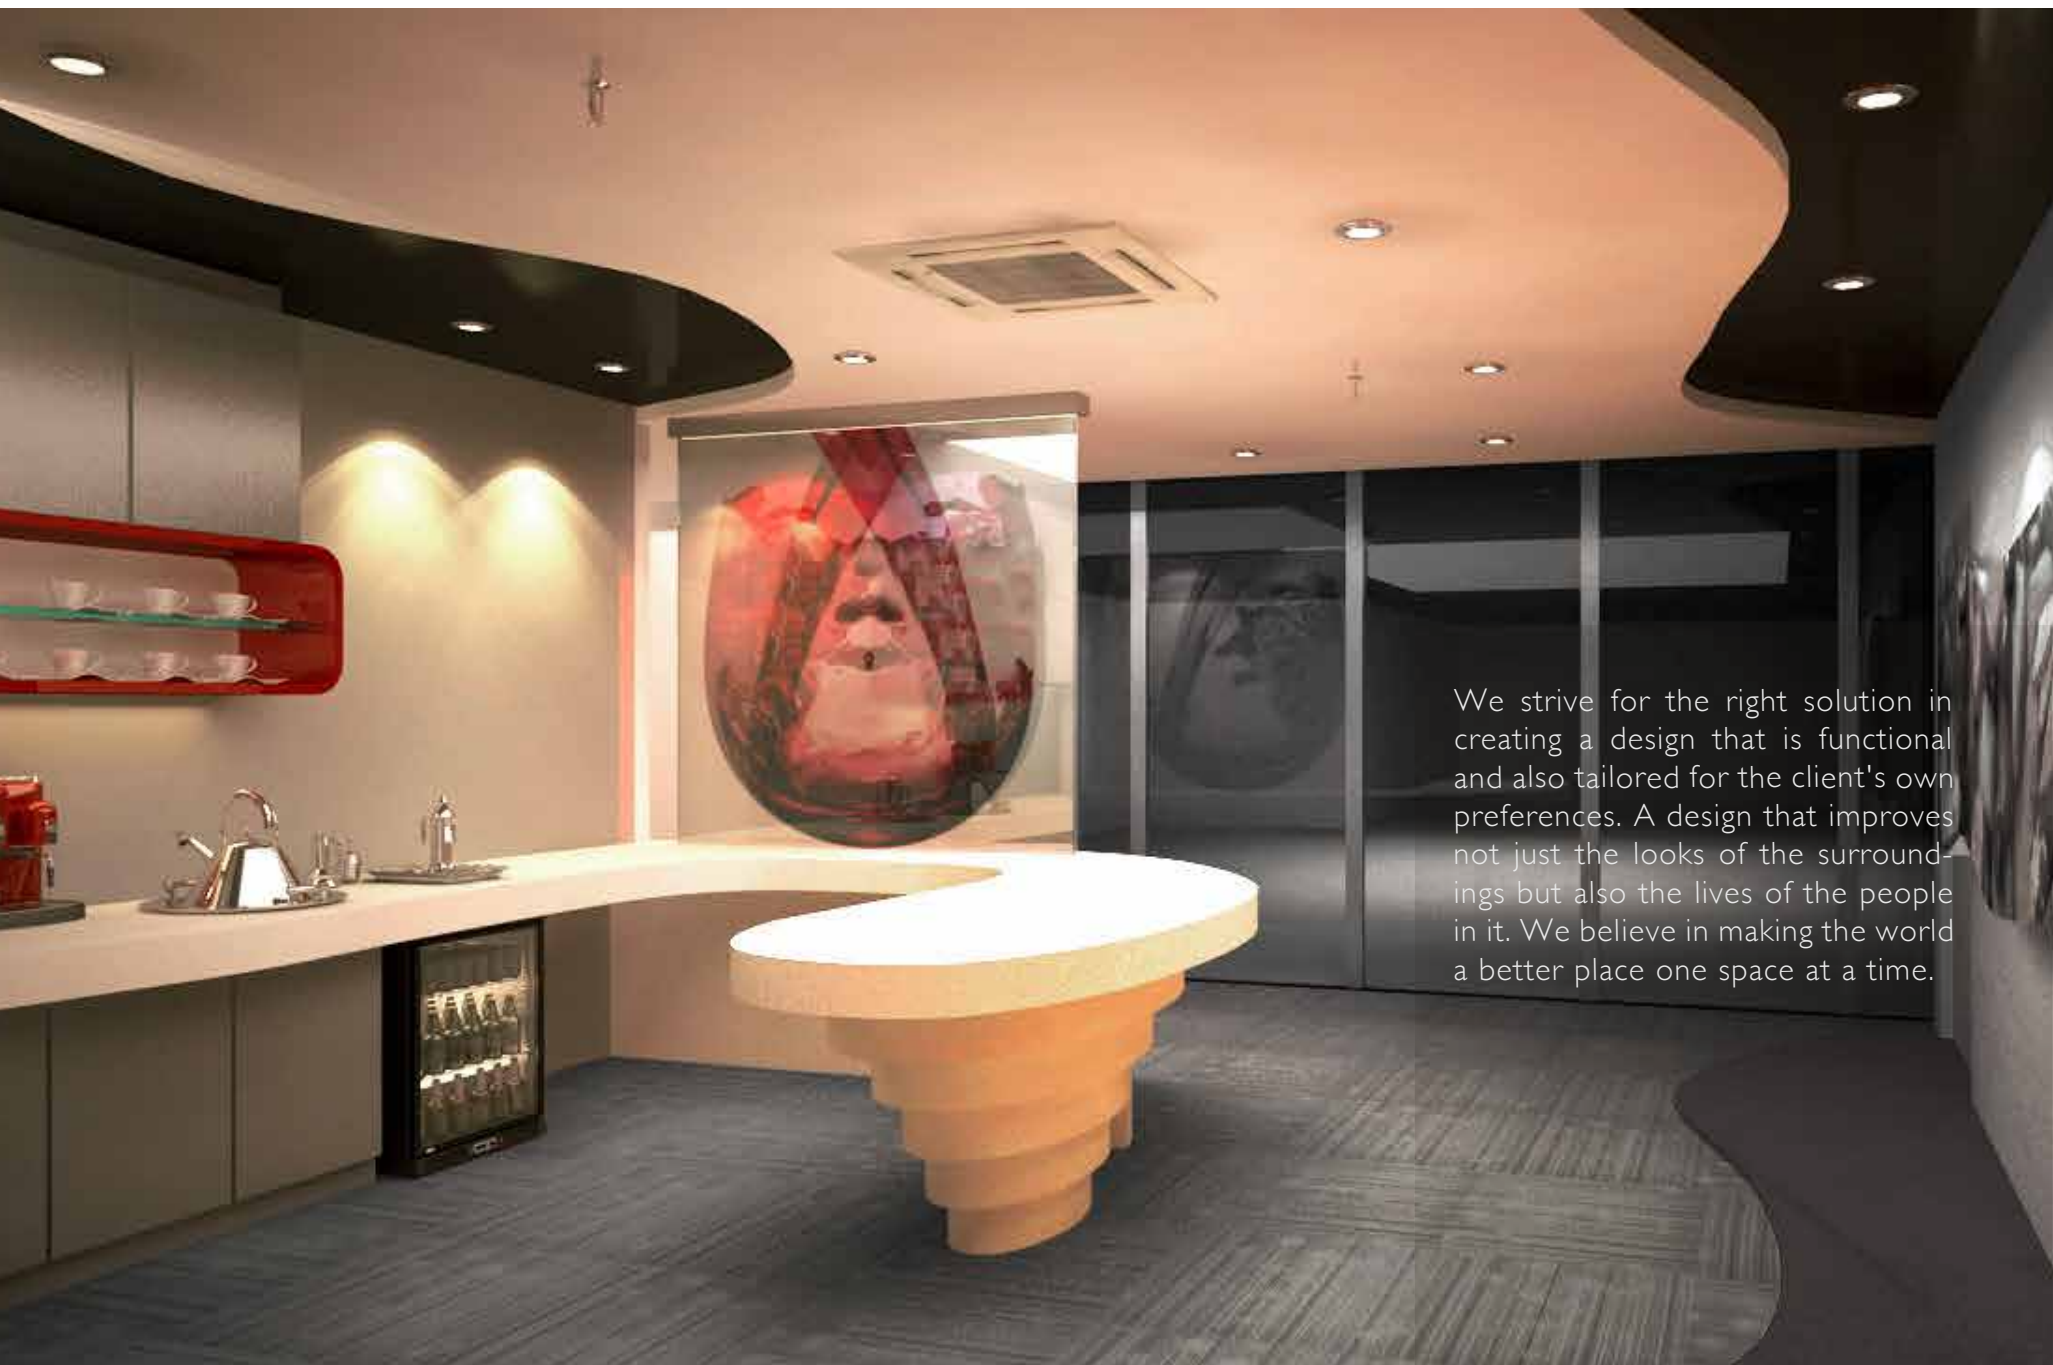

We are an engineering solutions provider; building state of the art offices and facilities. We pride ourselves on designing leading interiors. We offer full spectrum support to commercial, industrial and governmental clients across multiple markets. We also have regional offices that can serve you across geographical boundaries.

ADVANCELAB GROUP

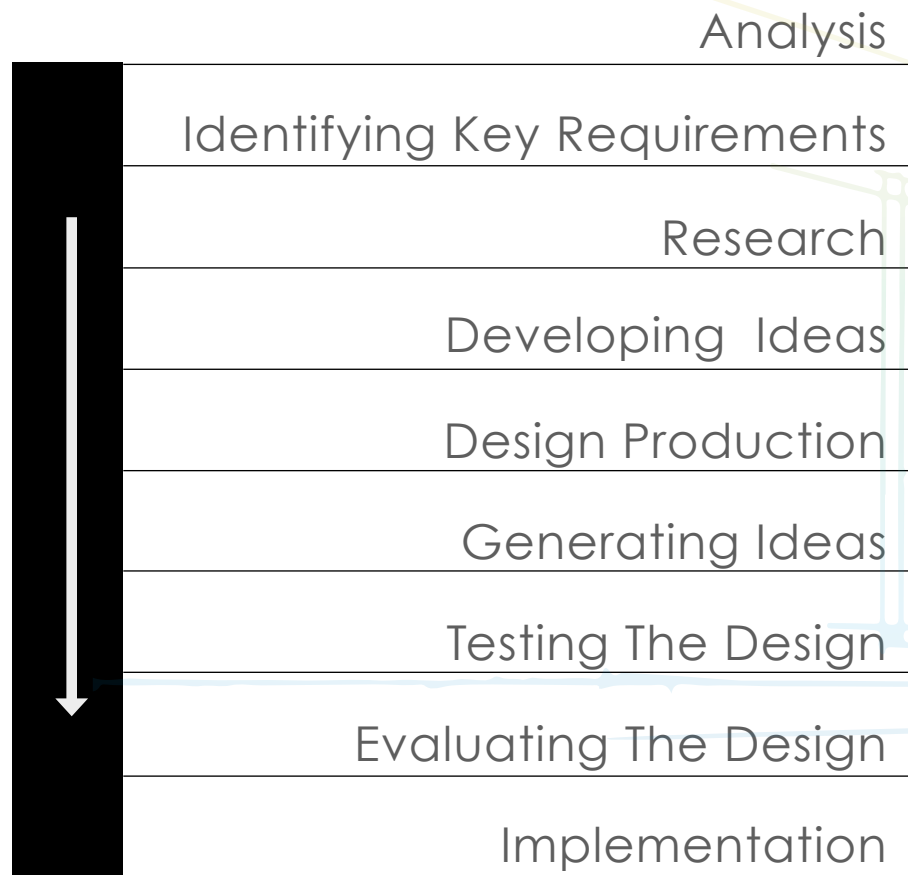

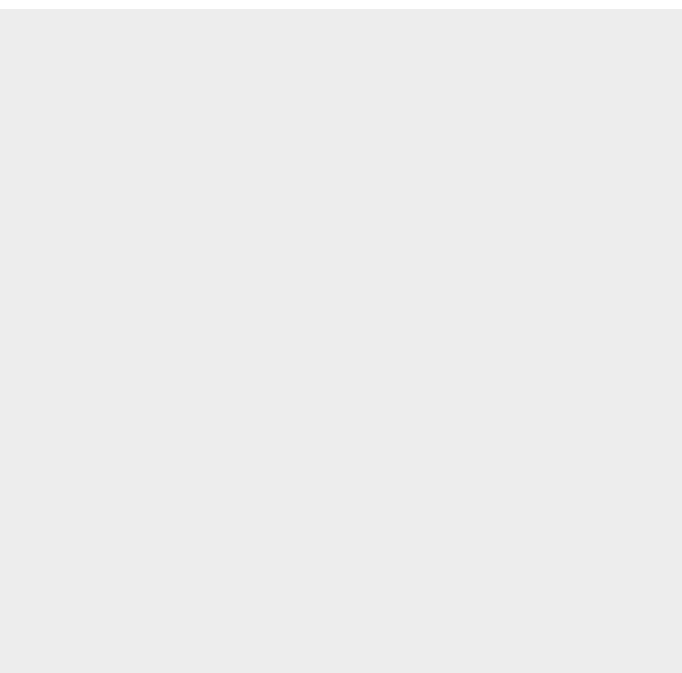

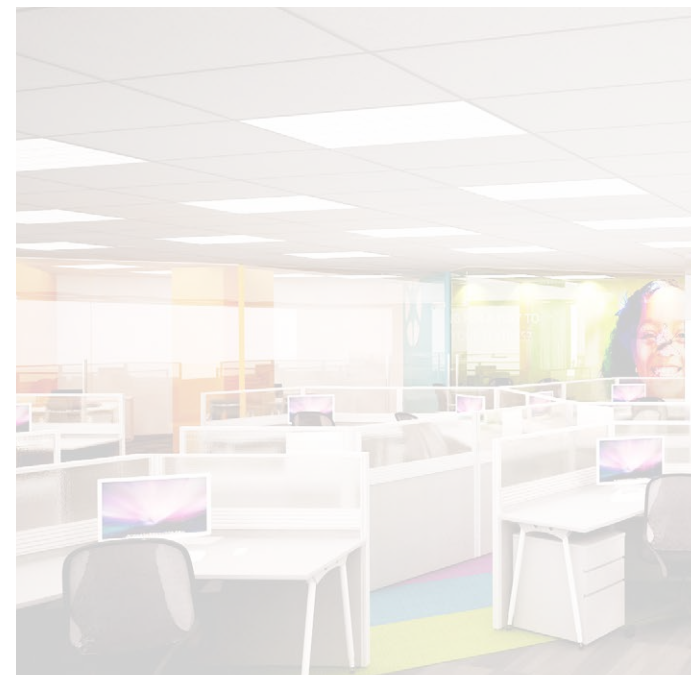

We strive for the right solution in creating a design that is functional and also tailored for the client's own preferences. A design that improves not just the looks of the surroundings but also the lives of the people in it. We believe in making the world a better place one space at a time.

START TO FINISH SOLUTION

SERVICES

Project and Site Assessment

Gathering information about the project area and space and determine key factors that will help in the design-making process.

Space Planning and Management

Preparing and developing plans and layouts after the requirements has been established.

Design and Documentation

Producing all proper documentations with detailed specifications, which includes 3D visuals and material samples for clients and/or contractors.

Budget and Cost Estimation

Planning and preparing budget cost for the project.

Contract Management

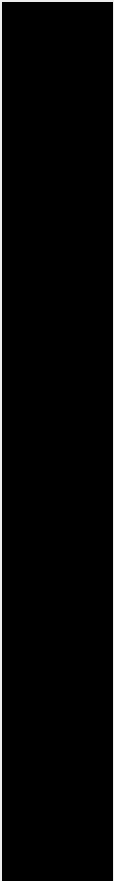

Managing all contracts made between client, vendors and partners.

Construction Administration

Overall planning, coordination and control of the project from beginning to hand over.

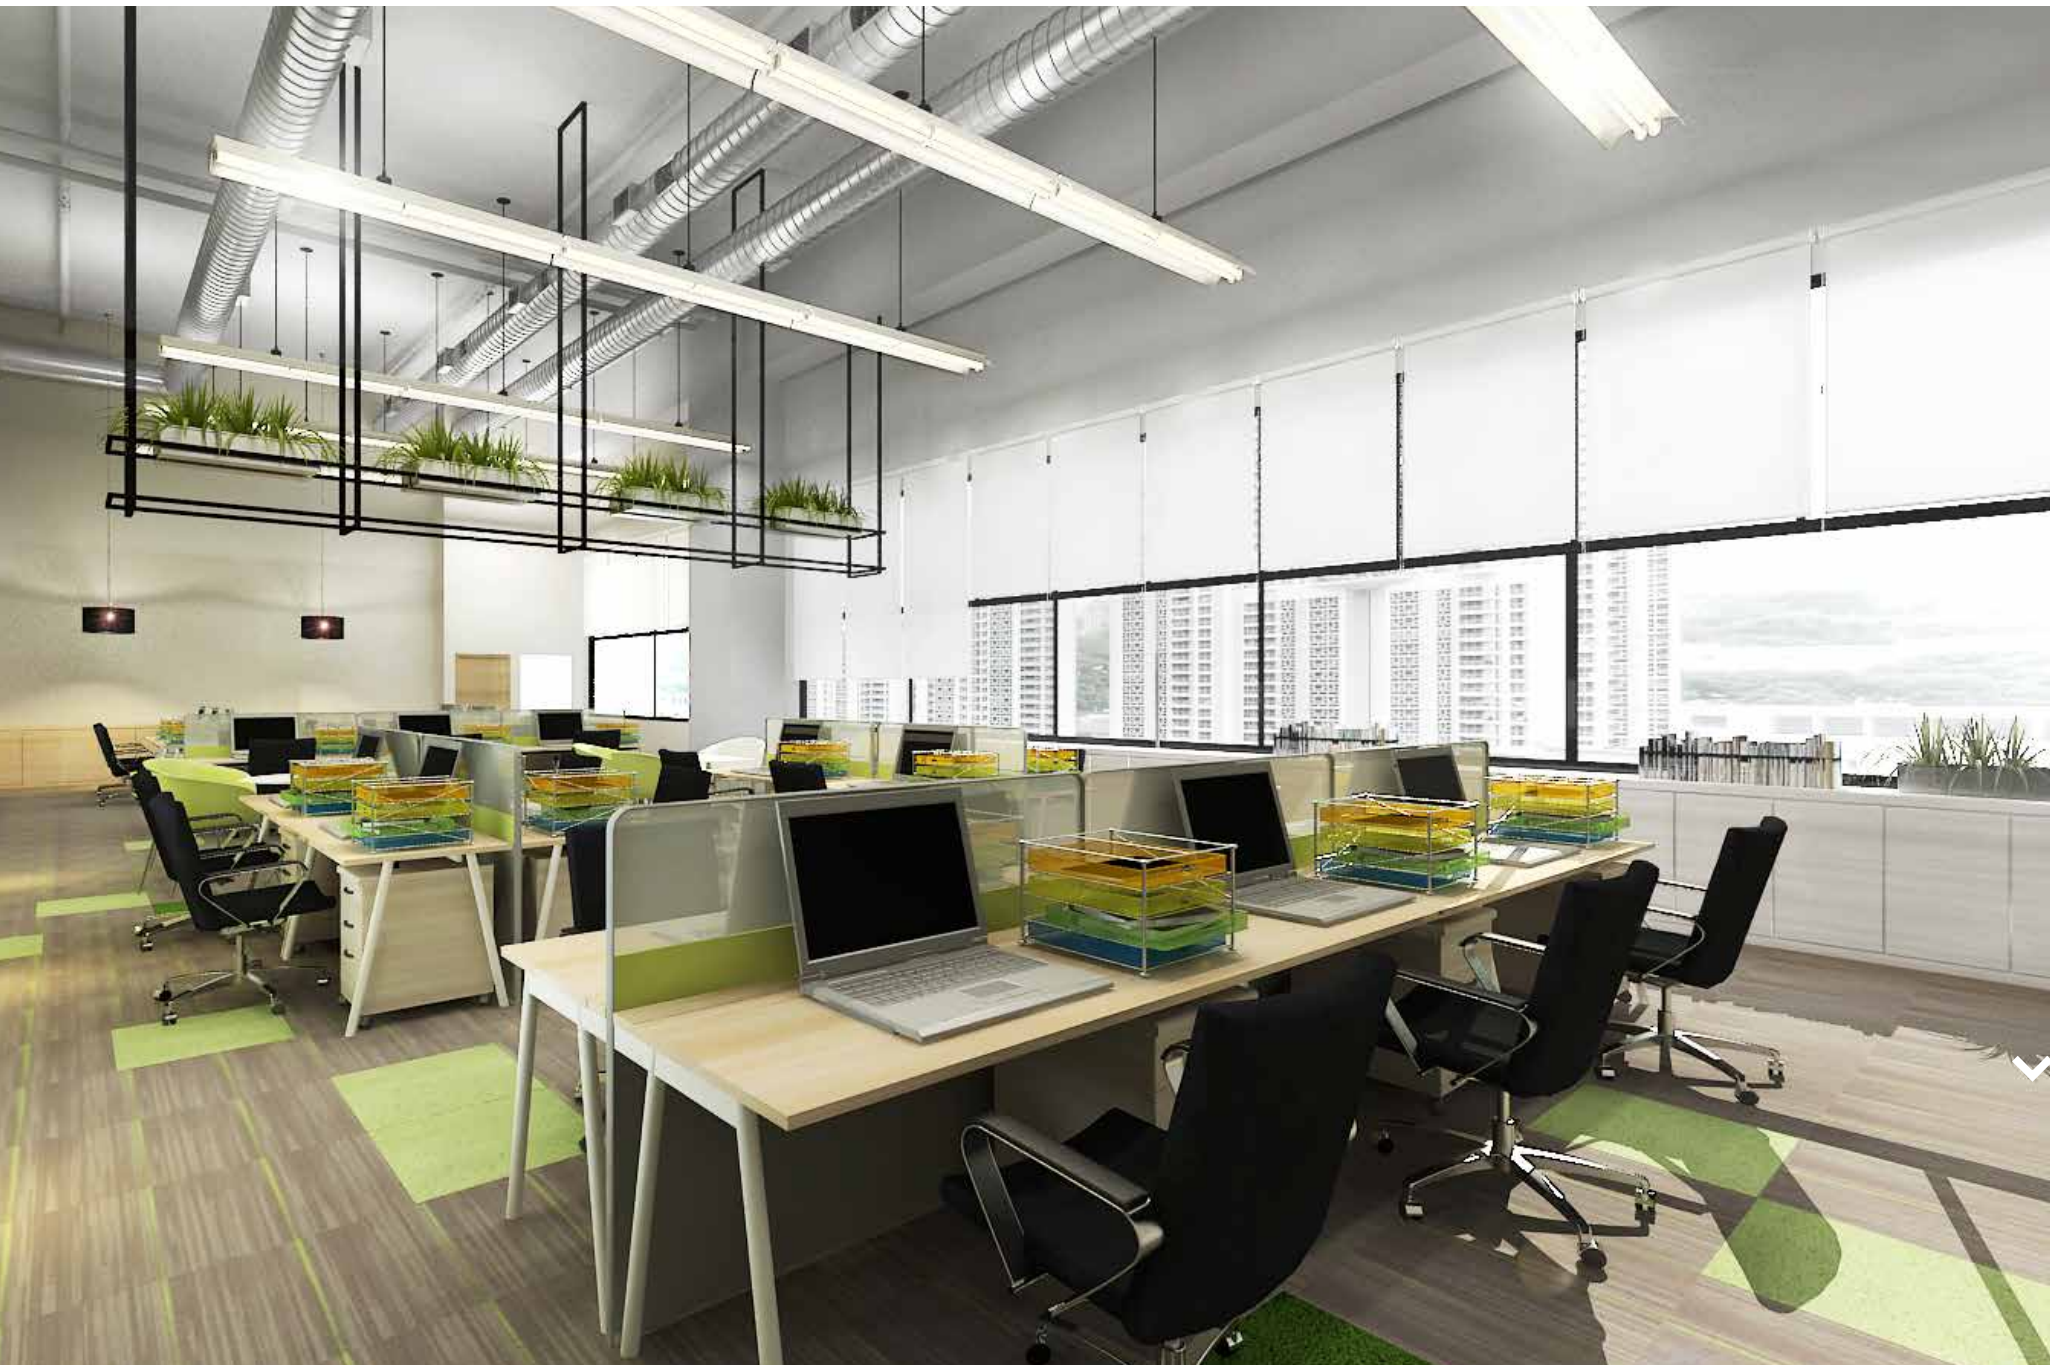

QUALITY / ASSURANCE

At Advancelab we believe that quality control is essential to realising a successful design that satisfy both the client and end user.

Our design approach is to make sure that everything is questioned and therefore quality checked, indeed it would fair to say that our Quality policy is built-in with the design process itself.

We review all on-going and completed projects, making sure that everything is properly documented as it goes thru all the stages until the full realization of the project.

We pride ourselves in handing over projects of quality and excellence.

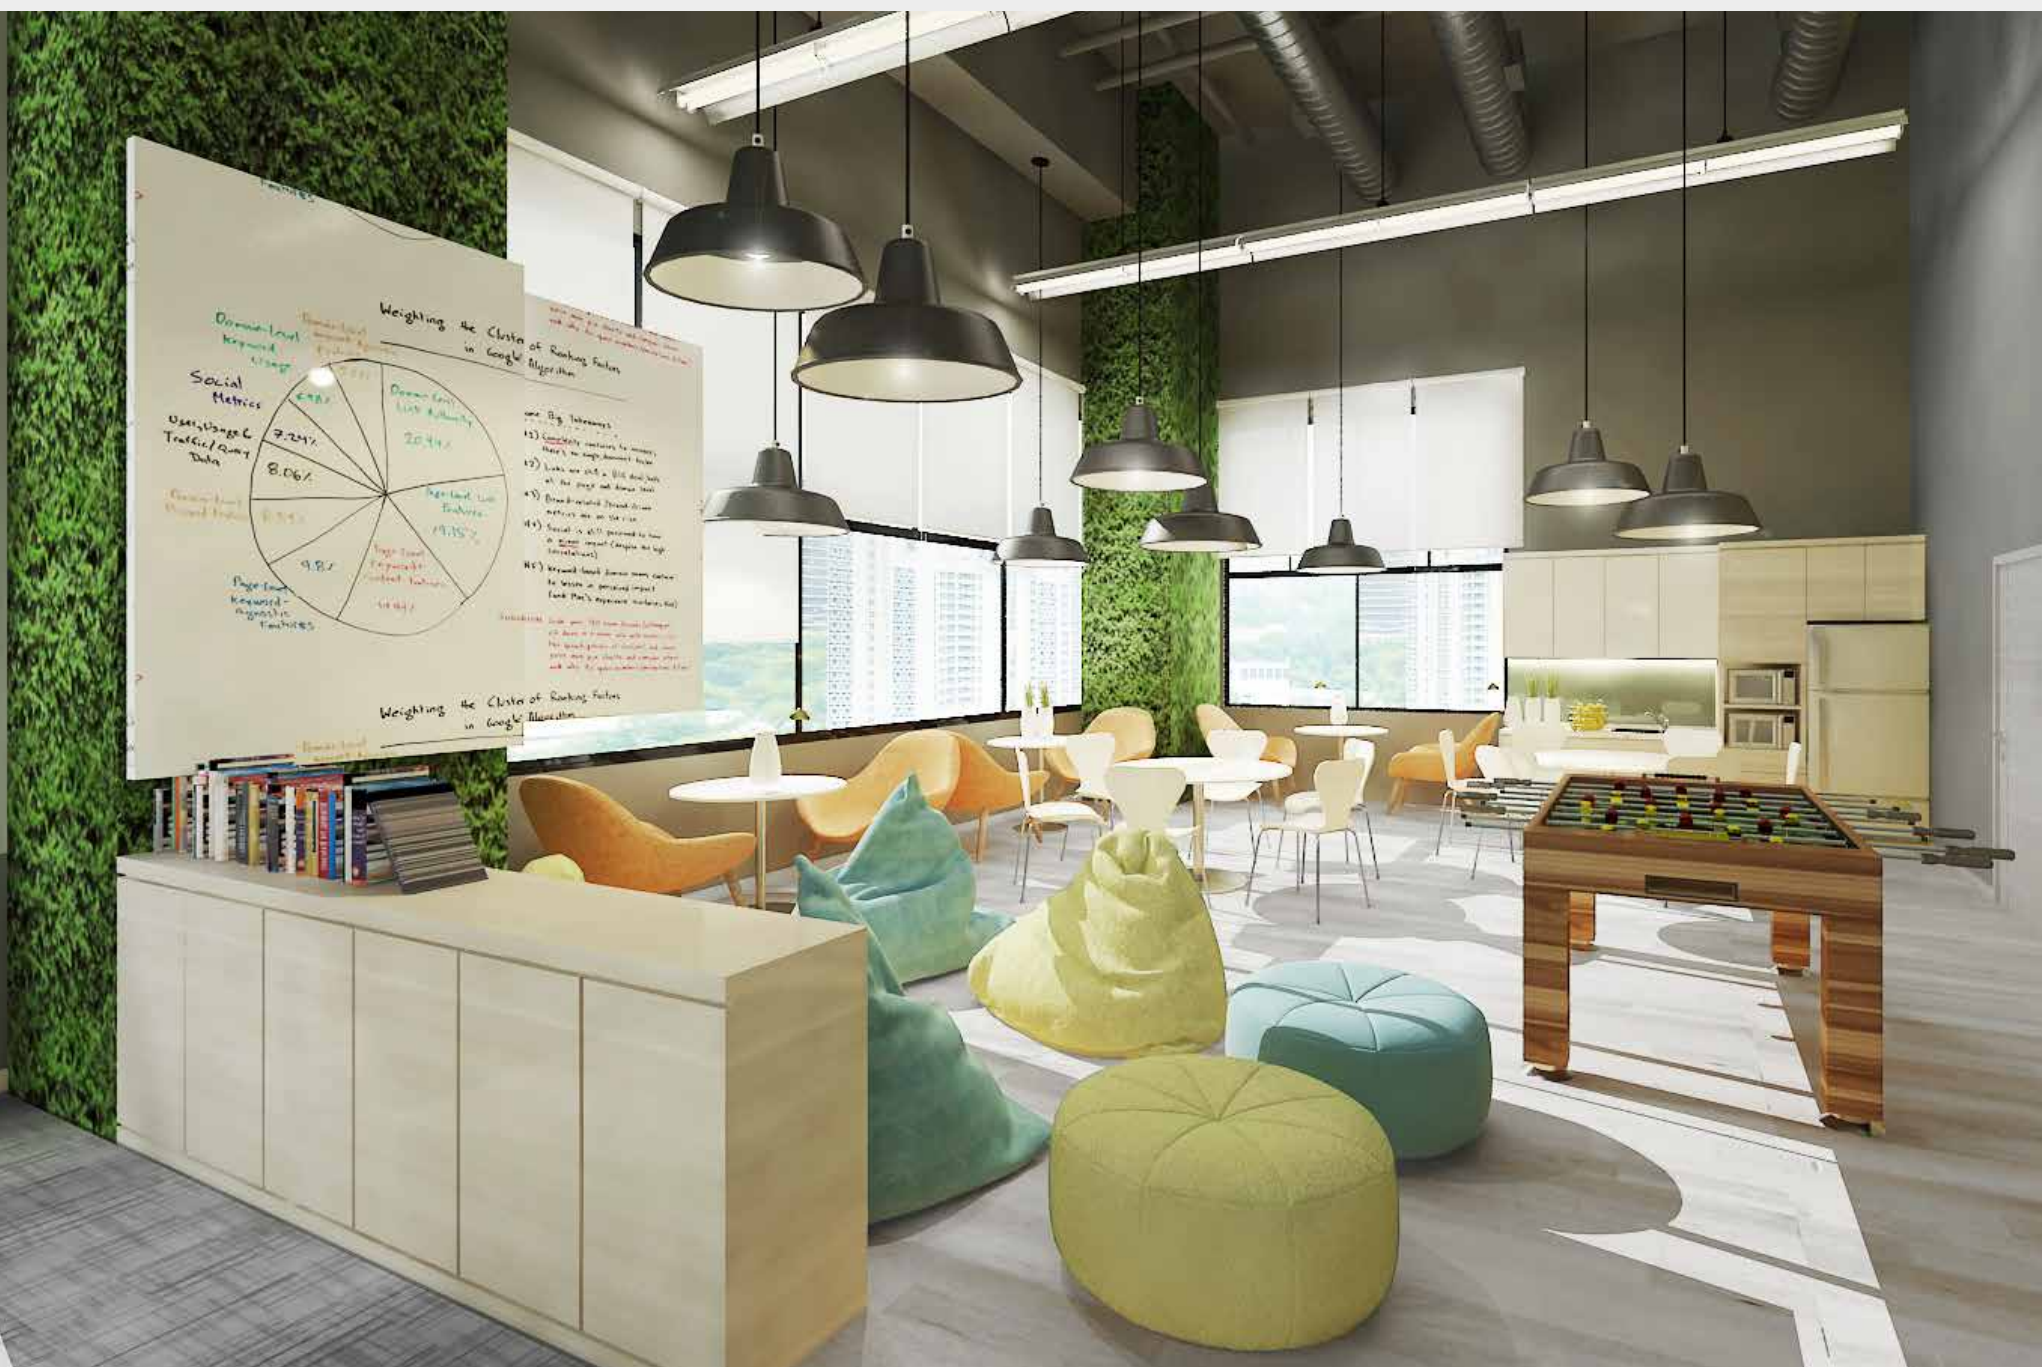

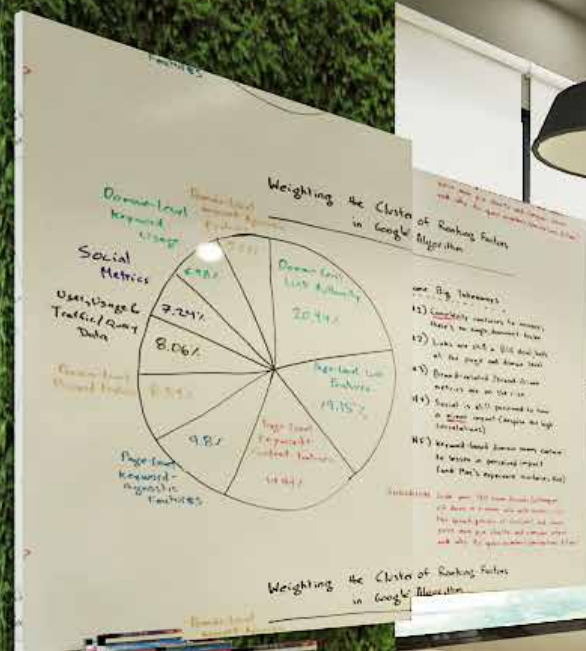

SAFETY

We are dedicated to keeping the highest standard of Safety. Keeping all measures necessary to ensure the safety of everyone involved in the project. We make sure everyone is informed about proper Health and Safety matters and that everyone complies with all rules and requirements.

Implementation of OHSAS 18001 Occupational Health & Safety Management System Standards is taken seriously. We aim maintain a Zero-accident work environment and continually improve through the process.
