Wash the products as soon as possible after use - to reduce the risk that dirt becomes ingrained with stains and odors as result.

First wash should be done at minimum 60 ° C and separately to avoid staining

Wash cloths and mops of various types separately, to avoid contaminating each other with lint.

Pre-rinse in cold water with frequent water change, no added chemicals - in order to remove any chemicals that can have been used for cleaning and may interfere with or cause a negative impact on the fabric at higher temperatures in the washing process
